

**SCHIESS**  
**DEFRIES**  
Systems GmbH

Your technical problem-solver when it comes to hoisting and moving heavy loads

# SCHIESS-DEFRIES Engineering turns your objectives into reality, from project planning through engineering all the way to turnkey delivery.

Our emphasis is on:

- Heavy load moving facilities
- Ship crane/hoisting facilities
- Transfer and cradling facilities
- Hydraulic heavy load lifting facilities

Worldwide, **SCHIESS-DEFRIES** carries out numerous projects in a vast range of areas and meeting a vast range of requirements.

## Ship lift

The SCHIESS-DEFRIES Engineering **lift-dock** offers a high level of speed, safety and flexibility.

## Cradling facilities

Slipways for ship docking

## Load-moving facilities

For moving the heaviest loads, including:

- Ships
- Bridges
- Large pipes
- Industrial facilities
- Concrete segments
- Bridge scaffolding

**football pitch sliding system**

## Hydraulic jack products

Our experienced team of engineers can deploy the widest range of lifting equipment.

Areas of application are:

- Hi-rise and underground construction
- Shipbuilding
- Bridge building
- Mechanical engineering and steel girder construction
- Offshore
